- Moderate Gaming

Professional Work Experience

2020-2021
Software Engineer   Systems Engineering Inc.
- Provided support for front and back end code for the company.
- Troubleshoot the server, database, and code to complete tasks such as bugs, client recommendations, etc.
- Worked on front end modals for better client experience with modern language C#.
- Co-Designed a automatic procedure to pull all RETS information for real estate offices and agents on a daily basis or when needed.

July 2020-September 2020
Web Software Engineer   Coder Foundry

Created three primary projects, including:

1. A portfolio site using C#, MVC, HTML5, CSS3, BOOTSTRAP, JS & jQuery.

2. A Financial Portal implemented in three phases. Phase 1: an MVC Web Application, Phase 2: a Web Service that utilizes Swagger and Swashbuckle for integrated testing, Phase 3: A cross platform Xamarin Mobile Application.

3. Fully designed and developed a multi-functional issue tracker web application, implementing enhanced roles & security, which also used a Code First Relational database designed and modeled in SQL Server. Technologies used include: .Net Framework v. 4.6.1, MVC5, C#, LINQ, SQL, Entity Framework, jQuery DataTables.
